PROJECTS

Freelancing Project: Working on a project where I am creating a website for a firm: *Jugaad Accounting Inc.* (HTML, CSS, JavaScript, GoDaddy)

Web Development Projects:

- **Personal Portfolio Website**: Created a responsive website to showcase my skills, projects, and resume.

- **Full-Stack Application**: Developed a web application using a frontend framework (React) and a backend (Node.js) with a connected database.

Software Development Projects:

- **Object Oriented Projects**: Created projects using C, C++ and Python language to enhance my skills and knowledge for backend development. All the Projects are uploaded on GitHub.

Cloud Computing Project:

- Using Microsoft Azure I created Virtual machines, Virtual Networks, Databases. I learned things about Networking, IP Addresses, Load balancer and Azure SQL Databases while pursuing the course in my studies.

Database Projects:

- **Database Design:** Created a database for a sample business, including data modeling, schema design, and writing SQL queries to manipulate and retrieve data.
- **CRUD Application:** Developed an application that performs Create, Read, Update, and Delete operations on a database.

WORK EXPERIENCE

04/2022 - Present   Customer Service Representative, Petro-Canada

- Provided excellent customer service by addressing inquiries, resolving issues, and coordinating with colleagues to ensure smooth operations. Stayed updated on policies and proficiently handled the POS system while managing customer complaints effectively.
- **Skills:** Operating and troubleshooting POS, Customer service skills, Multitasking and Problem-Solving.
